

Installing Python Notebook

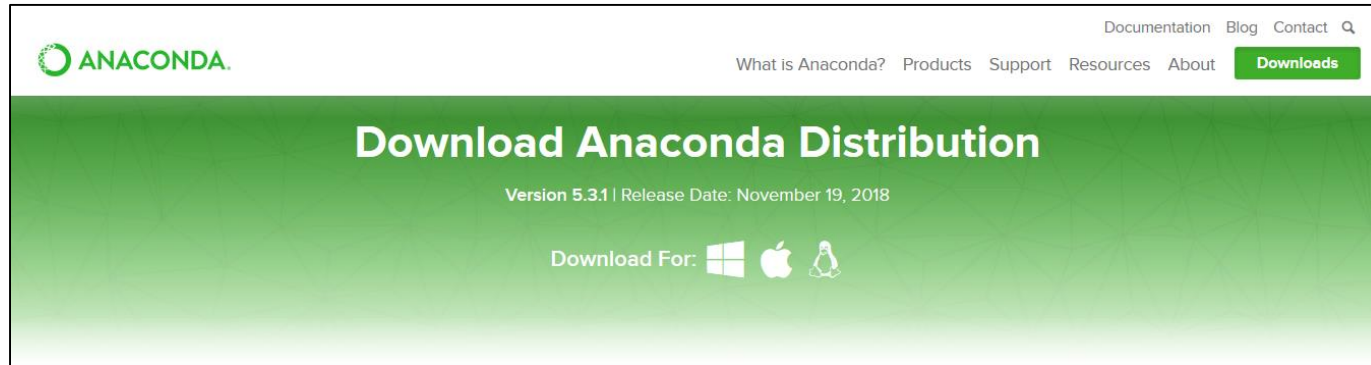

Math 381 Project

Gabriel Menescal, Taylor Merry, and Justin Ngo

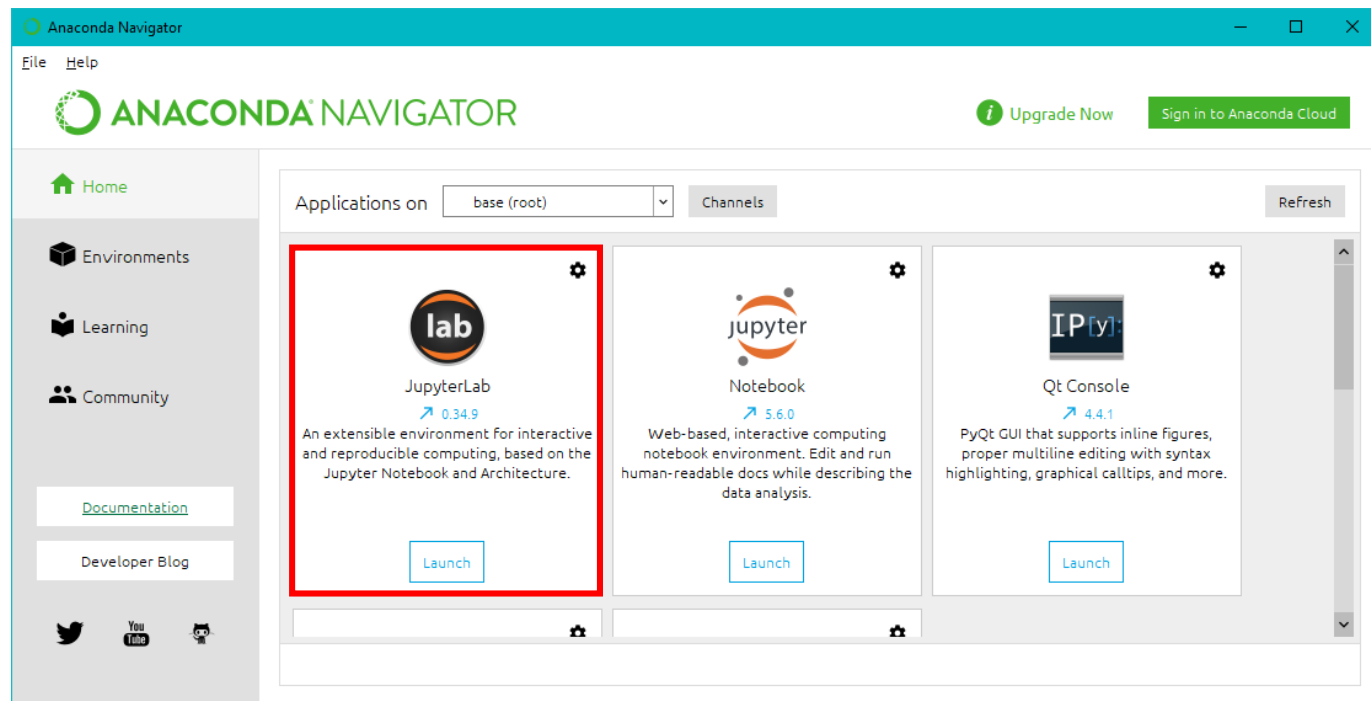

Installation Guideline

1. Install Anaconda Navigator
 - <https://www.anaconda.com/download/>
2. Install the required packages
 - numpy, matplotlib, turicreate
3. Open JupyterLab
4. Open the Python Notebook

Download Anaconda Navigator

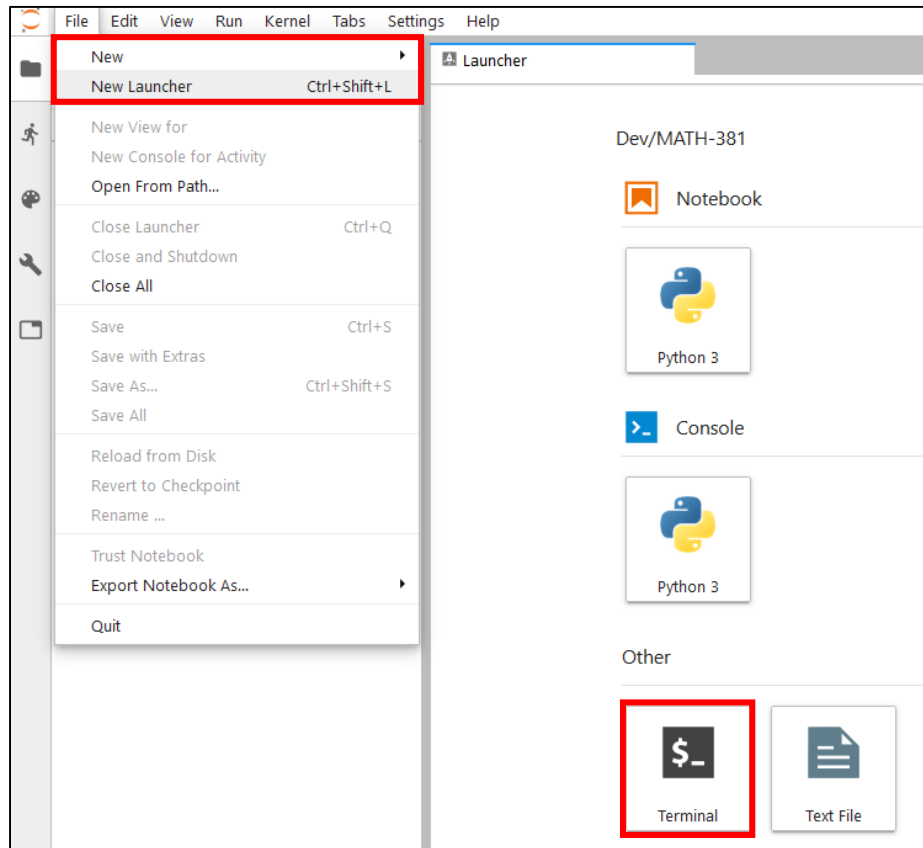

Download the right version based on your OS

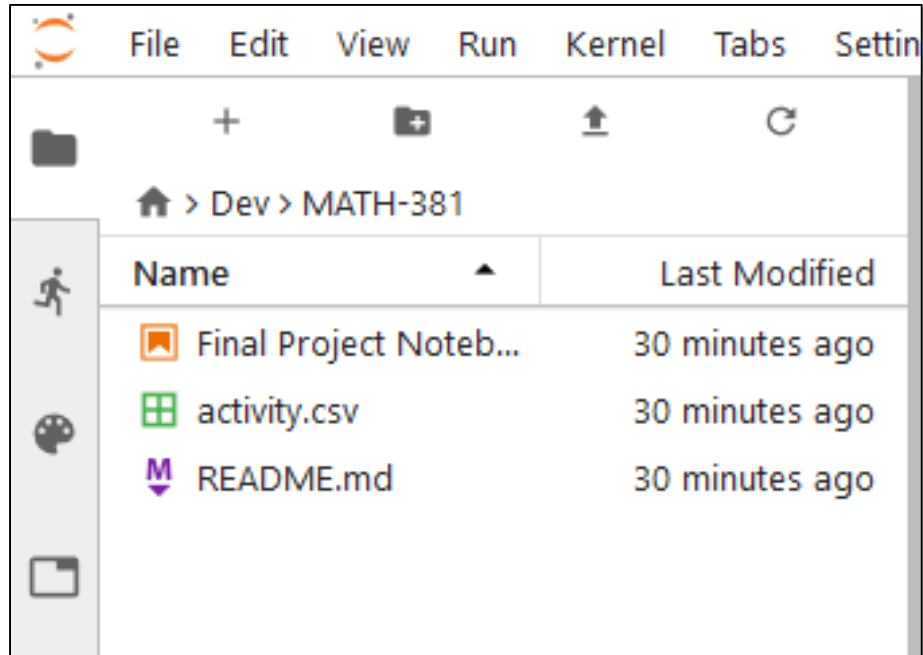

Use JupyterLab

Install Required Packages

1. Open **JupyterLab** and you should see the **Launcher**
 - If not, click File > New Launcher
2. Click **Terminal**
3. In the **Terminal**, type the following
 - `python -m numpy matplotlib turicreate`
 - You can use this command to install any missing packages

Open the Provided Notebook

In the Files Panel, open the Python Notebook
